

Team Developer™ 2005.1 for Windows and Linux

Develop business applications 40 percent faster.

Empower your organization, whether you are developing applications for internal use or you are under contract with a customer. Team Developer enables IT departments, VARs and ISVs the opportunity to build business applications faster, easier and more cost-effectively.

When it comes to the speed of developing rich-client to N-Tier and Web based solutions, Team Developer provides real advantages, giving you an alternative.

Thousands of developers worldwide use Team Developer to deliver applications faster than their competitors. By protecting the developer from the complexities of underlying technology, Team Developer dramatically shortens the time investment required of other popular visual tools. Team Developer's high level business language coupled with its structured outliner and intelligent editor allows developers to create applications **40 percent** faster than other tools!

New Opportunities:

The power of open cross-platform development and deployment for Linux and Windows translates into new business opportunities with existing customers and the ability to attract new customers.

Improve and Retain Customers:

Deliver projects faster and ahead of the competition.

Protect your Investment

Backward compatibility ensures applications can be easily migrated forward to the next generation development platform.

Cut Costs

Develop and deploy faster and easier and cut overall costs.

Superior Support:

GUPTA provides high-touch, high-care 24/7 global support.

GUPTA empowers your business, improve your margins. For more information on our products or partner programs please email sales@guptaworldwide.com or visit our website at www.guptaworldwide.com.

"Competitive pricing is very important to win development offers. Team Developer helps us keep development costs down and be very competitive in our project offers."

Dr. Martin Diestelmann,
Managing Director,
MD-Consulting GmbH
